Deliver superior experiences

It's easy with these
new features and functionality
in Banner® by Ellucian

Expanding possibilities

Did you know that we've added several new and enhanced applications that make your life easier and help you deliver better services? These new capabilities are built to simplify daily processes so you can offer your students the support they need to succeed. And, with an entire community of users just like you that share their experiences and feedback, you'll get the support you need.

Banner by Ellucian in action

Better functionality results in a better user experience. With the Ellucian Extensible Ecosystem strategy as the foundation for evolution, we design solutions for a global audience that can adapt to future changes as rapidly as your needs change. They are ready for the cloud, can scale up or down as your needs change, and are flexible enough to meet your specific requirements.

Even better, these are all quick and easy to download and available as part of your maintenance plan. And all that adds up to a lower total cost of ownership.

Banner® Student

We know how important it is to help students reach their academic goals in a timely fashion. And it often takes an entire campus working together behind the scenes. So we've enhanced and added apps that simplify your daily processes. Because when things go smoothly, you have more time to spend on your students so they have a better experience at your institution.

What you could be using right now:

- **Advising Student Profile:** provides consolidated, accurate information—all available from a single page that includes a student's profile, education, and career path—so your advisors can give truly personalized advice that helps students make better academic decisions.

- **Academic History and Faculty Grade Entry:** lets your faculty enter grades for class work assignments as well as post midterm, final, and incomplete grades—all from one location, from any device. And the module automatically tracks status to create a composite grade in your electronic gradebook.

- **Attendance Tracking:** makes it easy for faculty members to keep their students' data current so your registrar and financial aid officers don't have to spend so much time chasing information. It even tracks the last day of attendance, so financial aid is posted properly, which helps reduce debt.

- **Events Management:** helps you plan, manage, and monitor both virtual and in-person events such as freshmen orientation, campus seminars, and conferences. It makes is easy for attendees to register online and sends automatic updates about details such as time and location, so your events are better attended and you invest in events that pay off.

Banner® Registration module

We've updated the Banner® Registration module in Banner Student with intuitive registration tools and a tablet-friendly design to make it easier than ever for students, advisors, and administrators to use. The Banner Registration module offers the best of all possible worlds: it provides advisors with the tools they need to help students plan for success, it helps the registrar's office create demand analysis reports so they can anticipate course demand, and it delivers global capabilities so that all Banner Student customers can plan for and track program completion.

What you could be using right now:

- **Registration and Advising:** gathers degree audit information from Ellucian Degree Works™ Student Educational Planner or the Banner® Curriculum, Advising and Program Planning module to help students and advisors see exactly what a student needs to reach their academic goals.

- **Banner Registration Plan:** builds multiple student plans for current and future terms and incorporates information from the course catalog, advisor input, and degree audit information—which makes it easy to develop a course registration plan from a student's existing degree plan and turn courses into sections.

- **Search and Select:** follows a traditional registration model that allows students apply configurable course and section search parameters to create a personalized schedule.

- **Schedule Calendar:** alerts you immediately if there is a scheduling conflict so you can plan accordingly.

- **Enhanced Block Registration:** gives you the ability to pre-assign blocks of courses to individual students or through a batch process and lets students access the blocks based on pre-defined rules.

- **Structured Registration:** prescribes mandatory and optional courses which are concentrated on topics closely related to a student's area of study.

- **Projection Registration:** empowers you to take the next set of courses in the student degree program and deliver them to help students search, build a plan, and register.

- **Preferred Plan Indicator:** analyzes course demand so you can offer the courses students need and help enhance the advising experience with a long-term view of their educational plan.

- **Linked Sections:** minimizes registration errors by connecting lecture, lab, and recitation sessions that must be registered for concurrently so the student only has to register for all sections of the same course once.

Banner® Human Resources

The Employee Profile application in Banner Human Resources gives employees a more usable and informative view into their personal, employment, and job-related information. And, it provides managers with a comprehensive view of their team members with easy, more efficient ways to accomplish the administrative tasks involved in supervising employees. This flexible toolset gives faculty, staff, and administrators access to the information they need, when they need it.

The Employee Profile replaces the current employee self-service menu by providing one, streamlined menu that includes:

- **My profile:** gives employees access so they can update their profile or personal information whenever they need to.

- **My career:** offers a snapshot to employees including job history, pay, leave balances, and more so they can track their career and manage administrative tasks easily.

- **My activities:** provides employees with access to time entry, leave requests, salary planner, electronic personnel actions forms, and more so they can stay up to date with HR activities.

- **My team:** gives managers a direct report list that includes a link to each employee's profile and email address so they can send communications quickly. It also indicates any confidential information, so managers use a single dashboard with all the information they need to manage more effectively.

Explore what's new with Banner

Think of all you can accomplish with these new features and functionality. As part of our ongoing evolution, we're developing even more tools to help you deliver the experiences that lead to student success. Take advantage of all that Banner has to offer and adopt these new apps today.
