Ellucian Experience™

Simplify tasks and information access with a personalized dashboard

Ellucian Experience™ is a single platform approach to deliver Ellucian solutions across the institution.

Ellucian Experience™ brings order to the disconnected, varied systems and software used across higher education. Through a centralized, secure, and customized hub, every user, from the president to current students, has a single-entry point to the critical information they need, without switching screens or logging in to multiple applications.

"Moving to Ellucian Experience supports our college's strategic goals to help with student success and student completion, as well as to enhance the student experience. In line with our cloud strategy, because Experience is a SaaS platform, we don't have extra servers to maintain, which frees up our internal staff to focus on other key initiatives."

Jared Baber, CIO
Owens Community College

SaaS forward and future ready

- Accelerate time to value through continuous releases

- Reduces operational complexity

- Move to the cloud at your own pace through our SDK & design system

Yours

- Single user experience for onboarding, administration, and daily use

- Enable consistent interactions across all users

- Tailor to meet your exact institutional needs

Open and extensible

- Support application integration from Ellucian and partners (Ethos)

- Accelerate adoption with flexible development tools

Understanding the Experience tiers

Experience Foundation

The Foundation tier is available to all Ellucian customers at no additional cost. Experience Foundation allows institutions to present personalized information through built-in connections to institutional applications, low/no-code card templates, and single sign-on features with SAML 2.0 support. Institutions unlock the power of personalization and present timely, relevant content to students, staff, and faculty in a single, secure hub.

Experience Premium

Create a tailored hub for your institution with Experience Premium. Institutions gain access to advanced features and robust developer tools that allow deeper customization of your Experience dashboard. Included in Premium is our Experience Toolkit, which combines our Software Development Kit, Data Connect and PATH Design system, a companion Mobile Application, and extensive card content options. Experience Premium empowers institutions to create persona-driven experiences for all campus users.

Experience Features	Foundation	Premium
