

Ellucian Ethos Identity

Enjoy the convenience of single sign-on without the difficulty of managing it

Stay ahead with the industry's best practices

Ellucian Ethos Identity provides centralized single sign-on capability for Ellucian solutions. Built upon key components of the WSO2 Identity Server framework, it supports common industry-standard protocols, is certified to work with Ellucian solutions, and was designed to make single sign-on easier to implement for Ellucian customers. Although Ellucian Ethos Identity is built upon WSO2 Identity Server, it does not support all aspects of the WSO2 Identity Server.

Ellucian Ethos Identity features an easy-to-use administration console that allows IT administrators to view and update configuration information, all from the convenience of a web browser. In addition, institutions can choose to implement additional security options such as multi-factor authentication (MFA) leveraging Duo. This provides a more consistent and comprehensive method of handling security management.

Ellucian Ethos Identity features an easy-to-use administration console that allows IT administrators to view and update configuration information, all from the convenience of a web browser.

Multi-factor authentication has become a standard in providing secure authentication across not only Ellucian applications, but across all industries.

Ellucian Ethos Identity provides options working with well-known MFA providers:

Features	Duo Security	RSA SecurID	Microsoft Azure Active Directory
Deployment model	Cloud, On-Premise	Cloud, On-Premise, Hybrid	Cloud, On-Premise, Hybrid
Second factor methods	Phone callback, Mobile passcode, SMS passcode, Hardware token, Push notification	Phone callback, Mobile passcode, SMS passcode, Hardware token, Push notification	Phone callback, Mobile passcode, SMS passcode, Hardware token, Push notification
Self-service capability	Self-service portal, Self-enrollment, Self-management	Self-service Portal, Self-enrollment, Self-management	Self-service portal, Self-enrollment, Self-management
Additional features	Adaptive authentication*, Behavior*, Geo-restrictions*	Adaptive authentication	Adaptive authentication*, Behavior, Geo-restrictions

*Upgrade to Duo Access Plan

Set the standard at your institution

Ellucian Ethos Identity supports the most common protocols needed for secure authentication, which assures that institutions have a future-proof solution. Ellucian Ethos Identity runs on Windows, Linux, or UNIX operating systems, can be deployed in the cloud, and includes a number of key features.

 **Contact your account executive for more information**

-  Support for multi-factor authentication
-  Single sign-on protocol translation across CAS, SAML, WS-Trust/WS-Federation, OpenID Connect
-  Support for multiple user directory stores, including LDAP, Active Directory, Cassandra, or any JDBC database
-  Password validation and expiration policies
-  Customizable login pages to provide branding specific to your institution's needs
