

Ellucian Intelligent Learning Platform

Bundle the administrative and academic sides of course management into one efficient solution

Keeping data in sync between your learning management system (LMS) and your student information system (SIS) can be time consuming, inefficient, and cumbersome. Maintaining and upgrading integrations between systems burdens the IT staff, while faculty members are frequently frustrated by the need to enter student grades into two different applications.

The Ellucian Intelligent Learning Platform (ILP) is a single, easy-to-use platform that streamlines common teaching and learning tasks between administrative and learning management systems, making it easier for end users and institutions to seamlessly access data and manage information in real-time from within their administrative and academic systems. ILP provides APIs that enable real-time data-sync between applications.

Ellucian Intelligent Learning Platform

- Improves faculty experience and increases efficiency
- Fosters student success through streamlined processes and greater faculty interaction
- Reduces burden and cost associated with the maintenance of point-to-point integrations
- Encourages faculty engagement and adoption of the LMS

The integration between Ellucian Colleague, the Ellucian Intelligent Learning Platform, and Moodle is phenomenal. We've cut the time spent on course administration by 25 percent. Choosing Ellucian Intelligent Learning Platform is the best decision we ever made.

Capabilities

Automates data synchronization

ILP eases IT burden and eliminates duplicative data entry through the real-time synchronization of data between Ellucian Banner, Ellucian Colleague, or PowerCampus and an LMS. ILP synchronizes user, course, student enrollment, faculty assignment, academic term, and grade data. ILP also surfaces LMS data, assignments, calendar events, and notifications in Ellucian Mobile and Ellucian Portal via web services. The solution also supports standard single sign-on (SSO) authentication protocols and creates a unified user experience for faculty and student users.

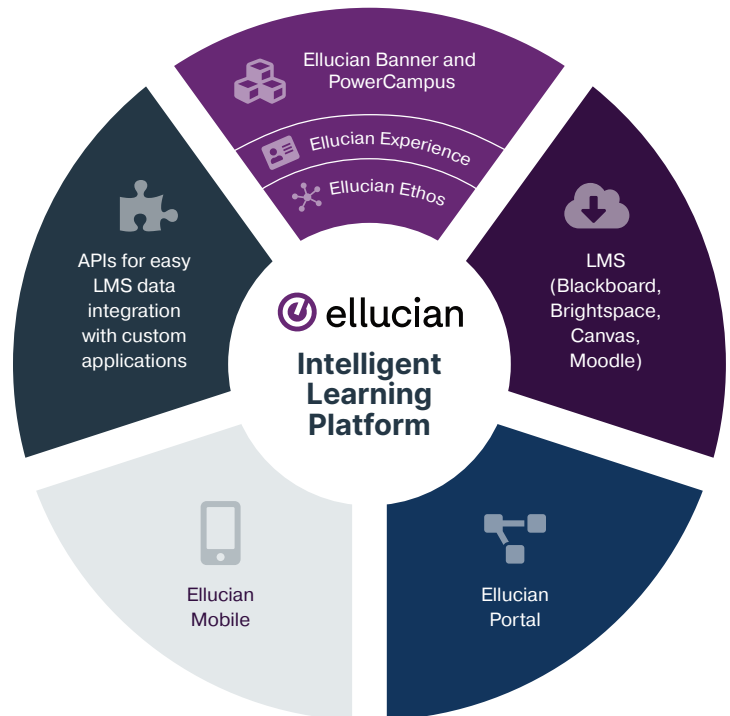

Integration with a breadth of applications

ILP works in the cloud through Ellucian Ethos to connect and maintain integrations with Ellucian Banner and Ellucian Colleague, and also integrates Ellucian Mobile and Ellucian Portal with learning management systems.

Easy access to content

With ILP, you can surface LMS data in Ellucian Portal and Ellucian Mobile with a single signon, integrate calendar items to see what's happening in each course, and receive real-time mobile notifications.
