

# Ellucian Cloud

Powering higher education's  
digital transformation

**“Implementation of Banner and its cloud-based technology simplified and streamlined the technical maintenance, support and operations process. Expandability and scalability have become very easy for the university.”**

**Rahid Alekberli**

Chief Information Officer,  
ADA University

The cloud is transforming higher education. It's moving colleges and universities out of the systems-maintenance game, letting them focus maximum resources on innovation and student success.

Delivering modern, engaging learning experiences is far easier in the cloud, where it's possible to keep pace with rapidly evolving technology. Cloud offers institutions of all sizes the technological agility, security and performance they need to compete in a difficult market, while connecting students with the services and support necessary to succeed.

Built for higher education, Ellucian Cloud can help your institution create a digital campus where students, teaching staff and administrative staff are empowered to succeed like never before.

## Cloud benefits

### **Resource optimisation**

Your IT team becomes a more valuable strategic asset. Freed from managing a data center, solving daily crises and implementing nonstop patches and upgrades, IT can focus on partnering with business units institution-wide to improve everything from data-driven decision-making to the student experience.

### **World-class security**

You gain a level of information security that would be difficult to maintain on your own. Ellucian Cloud applications and infrastructure

undergo regular third-party compliance audits, adhere to strict data-privacy policies and ensure strict governance over access, configuration and development.

### **Business continuity**

Your risk of disaster and disruption are greatly reduced, as data resides in multiple remote, secure locations—built on world-class Amazon Web Services (AWS) infrastructure. Cloud applications are more consistently available than those running on-premise, which keeps your campus running smoothly and your students on track.

### **Agility**

You can move resources around to ensure maximum impact on innovation and strategic priorities. In a rapidly evolving market, agility is the key to remaining responsive, efficient and competitive.

### **Performance**

You can stop making hardware investments that support peak load at limited points in the year (such as during course registration) but sit idle for the rest of the year. The infrastructure supporting the Ellucian Cloud is scaled up and down as needed to maximise performance.

### **Constituent experience**

You have continual access to the latest and greatest capabilities—without having to manage software upgrades. This greatly enhances your constituent experience in a world where ease and innovation have become basic expectations.

“Everything we do, we have got to try and do it in a way that maximises an individual student’s time on campus, to really leverage this, and at the same time enable students to take the campus with them and access all the services they need when off-site.”

**Robert Westcott**

Director of Information Technology, Royal Holloway

## Power of Choice

Ellucian is committed to helping customers choose from different deployment models based on their objectives. Options include:

- » **Software-as-a-Service (SaaS):** A shared software instance on cloud infrastructure fully managed by Ellucian. With standardised, best-practice deployment, SaaS gives you continuous innovation with minimal disruption.
- » **Managed cloud:** A dedicated software instance deployed on cloud infrastructure managed by Ellucian. Get all the benefits of management in the cloud, with the ability to maintain customisations.
- » **On-premise:** All applications and data live on campus and are fully managed and secured by the client. Retain full control over your systems, upgrades and customisations.
- » **Hybrid:** Some data and applications remain on-premise, while others reside in the cloud. We support whatever mix works best for your needs.

## Why Ellucian Cloud?

Ellucian offers all of the software solutions and services that institutions need to deliver a modern, integrated experience in the cloud.

**15 years**  
of cloud experience

**100+ managed**  
cloud ERP deployments

**~400**  
SaaS customers

“The only way we could have done this was through working with the team at Ellucian. We had a four-day migration run with work being done on the platform 24 hours a day. We could not have resourced that here. Even if we threw significant financial resources at something similar, we simply would not have had the expertise and the key IT stakeholders available 24/7 to support us when there was an issue. It was a world apart from what we are used to doing here upgrade wise.”

**Mike Johnson**

Strategic Projects Director, Royal Holloway

Ellucian is the world's leading provider of software and services that power the essential work of colleges and universities. More than 2,500 institutions in 50+ countries rely on Ellucian to enhance operations and enrich the student experience for nearly 20 million students.
