

SOLUTION SHEET

Ellucian Experience

Power meets personalisation

Ellucian Experience is your personalised hub for timely, actionable campus information. Experience aggregates relevant content from multiple sources to provide value and key information to everyone at your institution.

We all face information overload. Users are bombarded with data and updates from numerous sources and have to switch between software programs continuously. It's not unusual for a student to have to log in to five or more applications to access their campus information. It's becoming increasingly difficult for users to get a clear picture of their critical information and the important data they need to make decisions.

Ellucian Experience brings order to the laptops and phones of the higher education world. Through a centralised, secure dashboard, users have a single entry point to the critical information they need without switching screens or multiple sign-ons.

“Ellucian Experience offers the latest and greatest technologies. All you have to do is click on the card to go anywhere. The simplicity of the product is the most attractive part. I can’t say it enough.”

SAMIR GHORAYEB

Chief Information Officer
Lamar State College, Port Arthur

Powerful now

Built on a SaaS platform, Ellucian Experience integrates with both Ellucian and non-Ellucian platforms. The lightweight, no-code system means that higher education institutions can get up and running quickly, through both cloud and on-premise technology. With a personalised dashboard, users can see benefits immediately—such as up to 75 percent less log-in time—in a mobile-ready, responsive environment.

A centralised, secure information hub

- Integrated content from Ellucian and non-Ellucian applications: Users will enjoy the convenience of a single place for their tasks, alerts, updates, and information.
- Simplified operations with a single security model and pre-configured application framework: Experience includes “cards” configured for common business processes, allowing institutions to deploy and roll out Experience quickly.
- Rapid implementation with Ellucian support included: Support is included with all subscriptions to ensure customers are successful.
- 75% less system login time via single sign-on: Saves users time and frustration.
- Minimal training or support required: Experience meets today’s accessibility standards with a simple and intuitive platform.

Future-ready

Ellucian Experience enables IT teams to upgrade back-end software to the cloud or SaaS at their own pace, with no disruption to front-end users. The value of Ellucian Experience grows as more applications are added through software development kits (SDKs) that Ellucian provides to developers. Ellucian Experience also allows institutions to get the full power of Ellucian Ethos to connect people, processes, and applications.

The leading edge of your journey to the future

- Evolution at your own pace: By decoupling the user experience from backend systems, users enjoy a seamless experience even as IT migrates to the cloud.
- Supports collaborative development: Your developers and business analysts can easily configure the solution using user-friendly visual tools.
- Continuous innovation with frequent feature releases: As a SaaS solution, Experience ships with regular product releases based on customer feedback.

Yours

Ellucian Experience supports a fully branded environment with customisations and personalised dashboards for everyone on campus, where key tasks and timely information can be quickly accessed with minimal training and support required.

A simple, personalised experience

- A universal solution: Everyone on campus can use Experience, and each user will get a view tailored to their needs and preferences.
- Real-time dashboard updates: Dashboards show each user what they need to know, when they need to know it.
- Minimal training and support required: Ellucian Experience is simple and intuitive to use, just like today’s users expect.
- Easily supports institutional branding: Change the look and the feel of the application to match your institution’s brand and culture.
