

Ellucian Ethos Integration

Combining document management, electronic forms and workflow components into a fully scalable enterprise content management solution, **Etrieve by Softdocs** is truly the next generation of paperless. Designed specifically for educational institutions, this all-in-one ECM platform can be tightly integrated to Ellucian ERP systems through **Ellucian Ethos**. **Ellucian Colleague** and **Ellucian Banner** customers can leverage this integration, and enjoy a seamless experience that allows data to sync in real time between their ERP and **Etrieve**.

Etrieve Content

Central to the **Etrieve** platform, **Etrieve Content** acts as a single repository where an institution can store and organize all of their documents and content. When integrated with Ethos, ERP data can be leveraged to create an initial student, employee or vendor record in **Etrieve**. Automatically prepopulating index information allows any incoming content to be filed, organized and indexed to the record. This means no manual rekeying, as information is instantly communicated between the Ellucian ERP and **Etrieve**.

Additionally, subsequent updates made in the ERP such as name changes, address updates and advisor assignments, can trigger automatic updates to the index fields in **Etrieve Content**, ensuring data consistency across all applications.

Etrieve Forms

Designed to eliminate the need for paper forms and greatly reduce an institution's processing time, **Etrieve Forms** can integrate with Ethos for enhanced functionality. E-forms can pre-populate with ERP data, saving time and sparing employees and students from having to manually rekey information. When a form is completed and submitted, form data is automatically synced to the ERP. This ensures data is consistent across the ERP and **Etrieve** through secure web API communication.

Etrieve + Ellucian Ethos

Integrating **Etrieve** with an Ellucian ERP through **Ethos** will provide end users with a seamless experience and ensure data consistency across applications in real-time. **Ellucian Ethos** will align your ERP data with the extensive functionality of **Etrieve by Softdocs**, giving your students and employees instant, secure access to the information they need.
