

SOLUTION SHEET

Ellucian Data Management and Analytics Services

Powering new insights

Ellucian Data Management and Analytics Services enable your teams to harness the power of data and generate powerful new insights. Ellucian's services offer university leaders a trusted approach to building a comprehensive data management and analytics strategy that empowers teams to consistently deliver value to your institution and its constituents.

CTOs and CIOs face challenges with numerous systems, increasing data volumes, and reporting inconsistencies. Functional users question reports, rely on custom "data pulls" instead of analytics platforms, and assign too much energy to manual maintenance.

Ellucian Data Management and Analytics Services facilitate a collaborative evaluation of a customer's needs, identify the critical gaps, and provide data governance guidance. Ellucian consultants integrate insights and recommendations to provide a roadmap that maximizes the value of your data and prepares your institution to generate impactful outcomes.

TRUSTWORTHY

Ellucian's Data Management and Analytics Services are powered by the same experts that deploy, sustain, and enhance thousands of unique customer implementations. Our experts deeply understand Ellucian's industry and data architecture, which translates to bringing success to your institution.

Proven outcomes led by Ellucian experts

- **Unsurpassed knowledge of Ellucian data architecture and solutions:** We understand Ellucian's' data architecture and solutions better than anyone. Our team leverages insider knowledge to create robust data management best practices, leading to more impactful analytical outcomes.
- **Deep data life-cycle, integrity, and enrichment experience:** Our consultants leverage insights from countless customer engagements to assess process maturity and prioritize key projects to develop data into an institutional asset.
- **Analysis and guidance for data governance principles:** We help your organization build foundational processes and policies to manage the flow, authority, controls, and access required to maintain and protect your data assets.

COMPREHENSIVE

Ellucian's Data Management and Analytics Services address your current needs and create recommendations for the risks that may not yet be in view. Our experts collaborate with your stakeholders to assess data maturity and organizational design and create a high-level data strategy.

Organizational and operational roadmaps aimed at future insights

- **Data management program analysis and recommended improvements:** Build collaboration, communication, and data management insights across your teams, processes, and systems.
- **Recommendations for organizational design and structure:** Develop a deeper understanding of your organization's data maturity level from our analytics survey.
- **Operational guidance for defining data access for stakeholders:** Protect your institution's analytics information with clear access, compliance and accountability policies, and communications.
- **Analytics projects aligned to strategic priorities and timelines:** Communicate high-level data strategy roadmaps, priorities, and timelines to your institution's stakeholders.

EMPOWERING

Ellucian's Data Management and Analytics Services provide a clear roadmap to improved reporting and fortified data governance. When you partner with Ellucian, your institution's leaders will see the value in having a clear data strategy. Your teams will be empowered to develop an agenda, communicate realistic objectives, and generate new analytical insights.

Key institutional stakeholders instilled with confidence

- **Support from key institutional stakeholders:** Include the right stakeholders in your data strategy to ensure seamless integration with overarching strategies.
- **Strategic plan to drive AI and reporting advancements:** Construct your roadmap to improve utilization and get more value out of your data assets and reporting solutions.
- **Definition of data maturity status and key transformation opportunities:** Highlight data management risks and opportunities within your organization using industry recognized core data management pillars.
- **Clear path to improved data quality and trusted reporting:** Provide clarity of goal, timeline, and benefits with custom-built data and analytics strategy, maturity, and governance recommendations.
