

Ellucian Portal

Deliver the right information, tools, and services to the right people—anytime, anywhere

You have lots of valuable data, but it's housed in separate departments. You have a strong campus community, but it's not connected. You have messages to share and stories to tell, but you need to make sure they reach the right people at the right time. Enter Ellucian Portal.

No more logging into handfuls of systems and sites to manage day-to-day campus life. Ellucian Portal provides personalized, role-based, single sign-on access to the campus information and services that users need most. And it simplifies information exchange for your students, faculty, and staff by giving them a common gateway.

Build a vibrant online campus community

With Ellucian Portal, it's easy to brand your portal to match your institution's identity. You can also build unique sites for departments and teams so users can find, communicate, and work with each other. Native integration with Ellucian Colleague®

More than 400 institutions around the world count on Ellucian Portal to keep their campus communities connected

and Ellucian PowerCampus™ ERPs means data connections and accessibility are already complete. That leaves more time and flexibility for your IT staff to customize the user experience according to your institutional needs and priorities.

The Ellucian Portal can help you:

- Eliminate the headache of multiple logins with single sign-on access
- Personalize and customize content so users get the information they want—and the information you want them to see
- Provide real-time access to critical information by integrating solutions and data
- Design dashboards to analyze usage, view key indicators, and create a consistent user experience

Provide easy access to important information

With Ellucian Portal, users no longer have to log in and toggle between departments' and instructors' websites and systems. One login provides real-time access to all the content and services relevant to each person's role. That means faculty can load grades and students can check them seconds later. You can also create data dashboards to view key indicators, from first-year student engagement to department portal adoption—information that helps you make smarter decisions, faster.

Deliver relevant, targeted communications

Whether you want to let a student know that a hold has been placed on their account, inform faculty when grades are due, or share details about upcoming events with the entire campus community, Ellucian Portal lets you send automated messages tailored to your audience. And you can make sure they'll get them by choosing the format they prefer: email, text, or mail.

Relieve the IT burden

With flexibility to choose between the underlying technology of either Microsoft Share Point or Luminis, it's never been easier for your faculty and staff to organize information, build new experiences, and find support. Easy-to-use tools help them build sites, manage documents, and produce announcements without involving your IT staff. Open standards for content, portlets, web parts, web services, and front-end technologies reduce development costs, while use of existing application servers, databases, and operating systems reduces infrastructure costs.

Provide tailored experiences

By drawing on information housed in a common database, Ellucian Portal enables users to do whatever their role requires—whether that's posting course assignments and midterm test results or checking account balances and grade status. That makes it easier to identify at-risk students and provide them with the services and resources they need to succeed.

Ellucian is the world's leading provider of software and services that power the essential work of colleges and universities. More than 2,500 institutions in 50+ countries rely on Ellucian to enhance operations and enrich the student experience for nearly 20 million students.
