

University of Hartford applies technology to an innovative pandemic plan

Hartford, CT | 4-year | Private | 6,700 students

The challenge

Student success and well-being intertwined.

Despite the pandemic, the University of Hartford (UHart) set a goal to provide all students with a safe residential experience by leveraging the flexibility of Ellucian Banner and automating population health management.

The solution

Integrating solutions into a single platform.

Ellucian Banner

The result

End-to-end population management.

With Ellucian Banner, UHart created an integrated analytics workbench that consolidated disparate data sources into a predictive model for identifying potential infection risks, as well as a daily health survey to proactively maintain campus safety.
